

Tamás Molnár

Creative Web Developer | mtamas.com | hello@mtamas.com | linkedin.com/in/tms-mlnr

I'm a Full Stack Web Developer with 15+ years of experience, specializing in frontend development.

WORK EXPERIENCE

Skillbot AI Kft. / Full Stack Web Developer
JAN 2024 – NOV 2024

Developed the complete frontend of Skillbot AI's ChatMaster using Laravel, Vue, Inertia.js, Tailwind CSS, and WebSockets. The key challenge was building a stateless Backend-for-Frontend application that is horizontally scalable within a Kubernetes environment.

BeSocial Kft. / Full Stack Web Developer
MAR 2013 – NOV 2023

- Developed multiple website frontends with a strong focus on responsiveness, accessibility, and SEO best practices.
- Styled websites using vanilla CSS, as well as Sass and BEM, following atomic design principles.
- Customized Bootstrap via its Sass API to achieve distinct visual styles while minimizing the use of excessive custom utility classes.
- Wrote modern JavaScript, transpiling it with Webpack and Babel to ensure cross-browser compatibility.
- Worked on storefronts featuring advanced product list filtering and product variation handling.
- Created custom WordPress themes tailored to specific client requirements and modified or extended existing themes as needed.
- Collaborated with designers to translate their designs into well-structured, mobile-optimized, and accessible code.
- Notable projects:**
[herz.hu](#), [valdor.hu](#), [ebikeshop.hu](#), [besocial.hu](#), [marketingmorzsak.hu](#)

FREELANCE

Villa Marrakesh / noszvaj-villamarrakesh.hu
JAN 2025

I was responsible for the entire design and development process, starting with a skeleton design in Figma, building the site with Nuxt and Vue, and styling it with Tailwind CSS. I implemented accessible components using Radix UI and added animations and transitions with GSAP, ScrollTrigger and Lenis. The website is hosted on a VPS within a Docker-based environment and features auto-deployment via GitLab CI.

SKILLS

- HTML
- CSS
- Sass/SCSS
- JavaScript
- Node.js
- TypeScript
- PHP
- MySQL
- Docker
- Git
- SEO best practices
- Accessibility
- UI Design
